

LEMONBOTTLE CELLULITE / FAT DISSOLVE (Lecithin & Bromelain & Vitamin B2) (This Product is Korean & is not CE Marked)

LEMONBOTTLE is a new injectable compound premium Fat Dissolving product that is different from others on the **Korean Lipolysis Market** which has a unique blend of active ingredients that not only can destroy the fat cell but can help to excrete it from the body more efficiently.

High- concentration premium LEMONBOTTLE solution combines **Riboflavin (vitamin B2)** & other excellent ingredients to help with fat decomposition which can increase the metabolism of fat cells & can help to accelerate it.

Other unique features of Lemonbottle are the tightening effects which can occur in the areas treated & the reduction of cellulite. It can also facilitate the circulation of the lymphatic fluid & can rapidly release the degraded fat cells, which is effective in reducing & helping to eliminate cellulite in the area treated.

Composition of Lemonbottle:

Water, Ananas Sativus (Pineapple) Fruit Extract, Pentylene Glycol, **Bromelain** (phytotherapeutic protein stem), Sodium Chloride, **Lecithin Centella Asiatica Extract (Gotu Kola)**, Salvia Miltiorrhiza Root Extract, Chamomilla Recutita (Matricaria) Extract, Scutellaria Baicalensis Root Extract, **Riboflavin (Vitamin B2)**

Composition of Lemonbottle Explained:

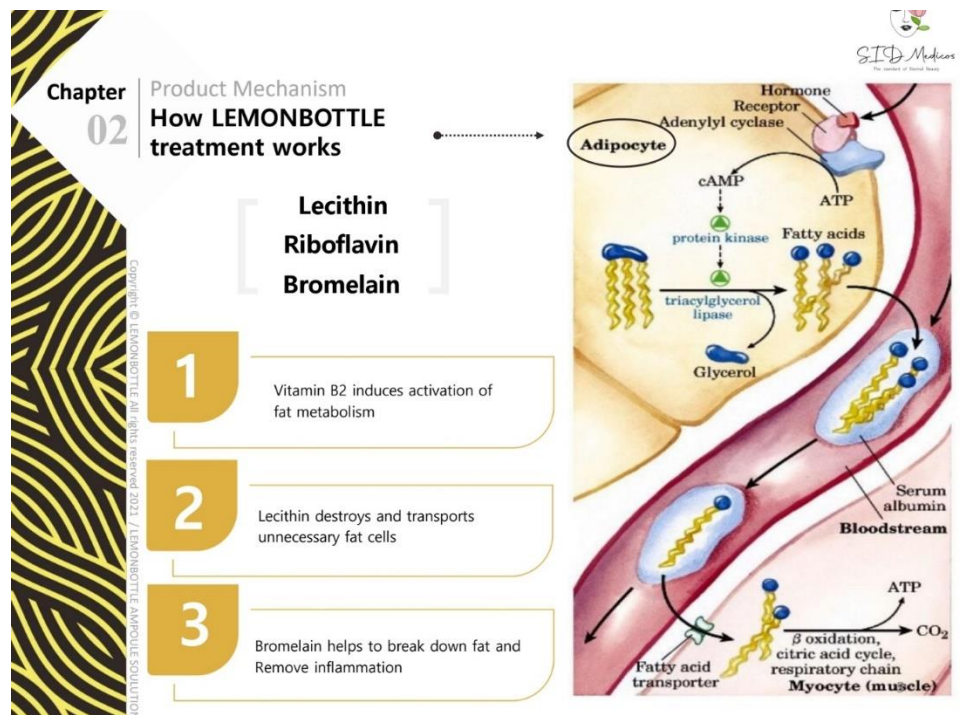

Vitamin B2 can induce the activation of fat metabolism, whilst **Lecithin** helps to destroy & transport the unnecessary fat cells.

The **phytotherapeutic protein stem Bromelain** is used as an anti-obesity alternative medicine, & it can help to induce apoptosis & lipolysis in mature adipocytes. **Bromelain** can help to break down fat & remove inflammation.

The secret ingredient is the Riboflavin (B2) that is not generally seen in Lipolysis products but has recently been found that it can drastically increase the degree to which the fat cell is affected, as well as time at which it takes from product administration to when the cell is excreted from the body as waste.

• **Gotu Kola (Centella Asiatica)** help to improve circulation as well as the synthesis of collagen & skin tissue. Collagen is essential for maintaining a taut & youthful complexion. The natural collagen we are born with diminishes as we age (at a rate of about 1% per year). By incorporating the benefits of **Centella Asiatica** into a Lipolysis product we can help to support the skin's underlying structure, therefore improving upon loss of firmness. **Centella Asiatica** is especially beneficial for improving elasticity.

Centella Asiatica is known to help reduce the appearance of cellulite & loose skin.

Before & After
2TIMES AFTER

Treatment HELPS with the following:

- Therapy supporting the fight against adipose tissue & Localised fat in specific areas
- Cellulite
- Big Cheeks
- Around Jaw Line
- Double Chin
- Not had a good effect on existing facial contouring
- Hips
- Fatty tissue on arms, back
- Fatty tissue on the abdomen & so-called side folds
- Fatty accumulations on the inner & outer of the thighs & knees

Before Considering Treatment Please be aware:

- If you wish you can & it is advisable to purchase numbing cream from the & apply to area being treated at least 30mins prior to appointment as it can be painful in some areas of treatment when the needle is inserted
- Please drink at least half a litre of water immediately after the treatment.
- Please Fast until the evening of the day of treatment & the full morning of the next day after treatment this will help to decompose & discharge unused fat in the body, reducing the size of fat cells.
- Please note as there is a high content of vitamin so your urine can appear yellow after the treatment.

- Massage treated area & to drink up to at least 2 litres of water per day throughout the course treatment.
- For best results it is advised 3-5 treatments, each treatment every 7-10 days & to drink up to at least 2 litres of water per day throughout the course treatment.
- The cost of treatment depends upon how big of an area is to be treated & how many vials of product needed to cover the desired area in total. Generally, a small area is from £90 per treatment & a large area is from £150 per treatment but this will be discussed prior to booking.

Treatment is NOT Suitable to Clients with the following Medical Conditions:

- Any Allergy to any of the components of the product above in composition
- Pregnant or breastfeeding
- Inability to produce fat (lipodystrophy)
- Have an acute or chronic skin disease, skin infection in the affected area or in the skin overlying the treatment area are not suitable
- Clients with pathological conditions (Mycobacterium)
- Conditions that affect fat processing in your body
- Diabetic patients should avoid treatment as the potential complications of diabetes can complicate treatment.
- Epilepsy
- Diseases of the immune system: Clients with autoimmune conditions such as scleroderma should avoid treatment.
- Clients with severe liver disease should not be treated as the extra fat it has to process could overwork the liver. Clients with severe kidney disease are not suitable for treatment.
- Clients on blood thinning medication, in particularly warfarin, will almost certainly not be suitable for treatment due to the risk of severe bruising.
- Blood diseases associated with excessive bleeding
- Circulatory diseases
- Cancer
- Unstabilized thyroid diseases
- Heavily Overweight Clients

Prior to the appointment you may if you wish to could take pain relief as every one's pain threshold is different, but not ibuprofen as this causes bruising.

Fat Dissolve Aftercare:

- There may be itching, stinging, redness, or warmth in the treatment area post treatment. This will last between a few hours to a couple of days.
- Swelling and bruising are normal and can reside for several days post treatment.
- The skin may feel tender to touch.

- It is important to massage the area treated & drink plenty of water to help the body remove the excess waste. We recommend 1-2 litres per day.
- Avoid sun exposure or sunbeds for a week post treatment to reduce the chance of hyperpigmentation.
- A healthy diet & light exercise should be maintained throughout the course of the treatment.
- In rare cases, nodules, necrosis, abscesses, hematomas, or infection may occur. If you experience anything that concerns you, please seek medical attention immediately.
- Pressure garments may need to be worn to enhance the effects of the treatments for short periods of time.

During recovery, recommend that clients avoid:

- Swimming pools
- Spas & saunas for 3 days
- Physical exercise for 10 days
- Any other aesthetic treatments for 2 weeks

Side effects and risks to be aware of:

- People treated will typically experience minimal side effects when compared to more invasion procedures such as liposuction

Common side effects

- Redness, swelling, itchy skin, pain & tenderness in the treated area
- Some people experience some light bruising, but this and any other side effects will usually last about 4-6 days

Potential side effects

- Flushing
- Vagal response (drop-in heart rate / blood pressure)
- Allergy
- Dizziness
- Nausea
- Necrosis
- Abscess
- Hyper-pigmentation

- Infections
- Could cause Sagging of the skin in Treated Area

Hematoma is the most frequent side effect despite all the precautions taken. However it can be easily masked by suitable make-up & can disappear within 4-6 days after the treatment.

If you experience anything out of the ordinary for you, as you know your own body better than anyone, & you are concerned, then common sense do not hesitate to seek medical attention immediately i.e. 111.

It is essential that you have read all the information available given by your practitioner.

Please do let your practitioner know if you have any questions or if you do not understand any of the aftercare instructions provided.

I will also get you to fill out a Medical History Form on my iPad etc to sign on the day as well as take a photo of ID if 25yrs or younger.

(This Product is Korean & is not CE Marked)**

Title (Mr, Mrs, Miss, Ms.):

First Name:

Surname:

Address:

.....

Post Code:

Date of Birth:

Home Tel: Mobile:

E-Mail: **(Please tick below to confirm you Agree to the following)**

___ I am voluntarily consenting to Lemon Bottle Fat Dissolve Injections & I am aware that this product is Korean & NOT CE Marked or Licensed to use in the UK.

___ I also understand that for best results it is advised 3-5 treatments, each treatment every 7-10 days & to drink up to at least 2 litres of water per day throughout the course treatment.

___ The cost of treatment depends upon how big of an area is to be treated & how many vials of product needed to cover the desired area in total. Generally, a small area is from £90 per treatment & a large area is from £150 per treatment but this will be discussed prior to booking.

___ I have been informed that treatment can take up to 4 weeks to start to notice any results.

___ I acknowledge that no written or implied verbal guarantee, warranty or assurance has been made to me regarding the outcome of the procedure. And I am aware that the Clinician can only work with each person's individual anatomy & the results are not guaranteed as we are all not biologically identical (even twins) & we all have different host responses to medications, vaccinations & aesthetic treatments as we all have different metabolisms.

___ I understand that the treatment can cause mild to moderate stinging sensation in the treated area that can last up to 1-4 days.

___ I need to avoid hot baths and showers, saunas, steam rooms and public pools for 48 hours post treatment.

___ There is a small risk of infection of the treated skin area after the procedure, although this is not expected to occur due to the sterility of the medical devices used.

___ Other side effects include, bruising, swelling, hematomas and slight reddening of the area that may be present for up to 14 days.

___ I understand that stopping treatment at any time may cause the original symptoms to return.

___ I understand that individual results may vary, and no guarantees are made regarding the expected outcomes of this procedure. I am happy to proceed with this treatment on this basis.

___ I confirm that the treatment and product being used has been explained to me in full and that I am happy to proceed with the treatment on that basis. I have asked all questions that I may have and received all appropriate aftercare.

___ I understand that I am undertaking this treatment knowing the full facts, side effects, treatment outcomes and complications and I will not hold the clinic responsible should any issues mentioned above occur.

____ I give full consent to the use of my before and after images for marketing purposes. Images will be kept for 6 years and may be used in the event of a claim being brought against us. They will be stored on a password encrypted hard drive.

____ Under GDPR rule I understand that I have full access to all data held on me. This data will be held by the clinic for no longer than 6 years for insurance purposes, after which, digital information will be deleted permanently, and paper documents will be destroyed. All information on myself is kept on password encrypted hard drives or locked in filing cabinets to which only selective staff members have access. None of my personal data will be sold or used for anything other than to provide the services of this clinic.

Please ensure you understand the potential complications and personal requirements of the Fat Dissolve injections procedure that have been indicated within this document.

I confirm that to the best of my knowledge that the information that I have supplied is correct and that there is no other medical information I need to disclose.

I understand that treatments and products is not an exact science and therefore that no guarantee can be given as to the results of the treatment referred to in this document. I accept and understand that the goal of this treatment is improvement, not perfection, and that there is no guarantee that the anticipated results will be achieved.

Any side effects which last more than 1-2 weeks you must contact your Aesthetic Practitioner who will give appropriate advice.

Anything else you feel I need to know?

My Studio is at my Home Address & contact details are as below.

Any further Questions, please do not hesitate to get in contact.

Clients with unattainable expectations are not suitable for treatment.

Managing Expectations.

Swelling cannot be predicted or controlled immediately after treatment as you may look swollen & bruised in areas treated.
